

DEPARTMENT OF HEALTH & HUMAN SERVICES

ADMINISTRATION FOR CHILDREN AND FAMILIES
330 C Street, S.W.
Washington, D.C. 20201

Case No. 18-F-0264 (American Oversight v HHS 18-cv-2845)

March 13, 2019

Austin R. Evers
AMERICAN OVERSIGHT
1030 15th Street NW, B255
Washington, DC 20005

Dear Mr. Evers:

This is in response to your request for Copies of all "Capacity Report Update" spreadsheets from January 2017 through the date of the search produced in native Excel format.

Agency employees have conducted a thorough search of their files and located the enclosed 251 pages of responsive records. I have determined 248 pages are releasable in full, without redactions and three pages are being released in part, with portions redacted pursuant to Exemption (b)(6) of the FOIA (5 U.S.C. §552 (b)(6)).

Exemption 6 permits the withholding of information and records about individuals in "personnel and medical files and similar files, the disclosure of which would constitute a clearly unwanted invasion of personal privacy." The definition of "similar files" has historically been broadly interpreted to include a wide variety of files, and the United States Supreme Court has held that Congress intended the term "similar files" to be interpreted broadly, rather than narrowly. From the enclosed records, the identities and contact information of non-federal employees has been redacted. I have analyzed these records and find they meet the threshold requirement of this exemption. Additionally, I have reviewed and weighed the public interest in disclosure of this information against the privacy interest in nondisclosure, and found that the privacy interest outweighs the public's interest in disclosure.

You have the right to appeal this determination. By filing an appeal, you preserve your rights under FOIA and give the agency a chance to review and reconsider your request and the agency's decision.

Your appeal must be mailed within 90 days from the date of receipt of this letter, to:

Kim Hutchinson, Deputy Agency Chief FOIA Officer
U.S. Department of Health and Human Services
Office of the Assistant Secretary for Public Affairs
200 Independence Avenue, S.W., Room 729H
Washington, DC 20201

Please clearly mark both the envelope and your letter "Freedom of Information Act Appeal."

If you would like to discuss our response before filing an appeal to attempt to resolve your dispute without going through the appeals process, you may contact me directly at FOIA@ACF.hhs.gov. You may also contact the HHS/ACF FOIA Public Liaison for assistance at:

Kenneth Wolfe, FOIA Public Liaison
HHS FOIA Public Liaison
U.S. Department of Health and Human Services
ACF, Office of Communications, 4002A
330 C. Street S. W.
Washington, DC 20201

If you are unable to resolve your FOIA dispute through our FOIA Public Liaison, the Office of Government Information Services (OGIS), the Federal FOIA Ombudsman's office, offers mediation services to help resolve dispute between FOIA requesters and Federal agencies. The contact information for OGIS is:

Office of Government Information Services
National Archives and Records Administration
8601 Adelphi Road – OGIS
College Park, MD 20740-6001

Telephone: 202-741-5770
Toll-Free: 1-877-684-6448
E-mail: ogis@nara.gov
Fax: 202-741-5769

Sincerely yours,

Celeste Smith
FOIA Director
Office of Communications
Administration for Children and Families
U.S. Department of Health and Human Services
Washington, D.C.

INVENTORY RECOVERY CATEGORY	INSTRUCTIONS/NEXT STEPS
A - Isolation/Quarantine - Confirmed Consistent with ORR Policy	Coordinate with program and ORR Health Team to identify estimated date for beds again available. Update regularly, particularly at estimated available date.
B - Isolation/Quarantine -Not Yet Confirmed Consistent with ORR Policy	Confirm whether isolation/quarantine procedures in place specifically conform to ORR Health Team's issued policy on isolation/quarantine/medical clearance. All medical clearance/iso/quarantine entries START as category B, and can be made category A after the PO and Health Team confirm that the current iso/quar status does in fact track with ORR policy.
C - Pregnancy or maternal-child	Coordinate with program to develop estimated date when bed will again be available based on anticipated approximate discharge date for UC.
D - Intakes Hold	Discuss with ORR DCS management to determine estimated date for hold to be lifted.
E - Licensure issue - Non-variance	Consult with program to determine estimated date when licensure issue will be resolved. Follow up at or immediately before estimated date.
F - Licensure issue - Variance	Consult with program to determine estimated date when licensure variance will be received. Follow up at or immediately before estimated date to ensure beds return timely to available status.
G - Repairs/structural	Consult with program to determine timeline for repairs and any potential need for reinspection, to determine estimated date for beds to return to available status.
H - Foster home shortfall	Consult with program to determine whether shortfall in foster parents or foster home is short term (e.g., respite period only, family vacation only) or longer term. For short term, determine estimated date to return to available status. For longer term, determine estimated date only if realistic/known, if not report as "More than 30 days."
I - Other medical or reasonable accommodation	Consult with program to determine estimated date beds will return to available status, based on prediction of discharge date for UC or resolution of medical issue. If warranted, clarify with shelter program and Health Team whether an alternative approach to the medical or disability-related accommodation which preserved additional beds is possible.
J - Transgender UC/gender bed assignment	Consult with program to determine estimated date beds will return to available status, based on prediction of discharge date for UC.
K - Multiple Causes/Needs Clarification	This is used when multiple categories of bed unavailability appear in the description. Separate into separate chart rows for each reason for bed unavailability, with granular number of beds for each, and assign category to each row based on this chart.
L - Unknown/Needs Clarification	This is used when the description does not contain enough information to determine the cause of individual bed unavailability. Contact program as required to develop granular information on causes of bed unavailability and use this chart.

Facility	Discrepancy
CC - Houston	When a baby is in care, he/she takes up two beds, so for each baby in care, the facility will be under their funded capacity by one bed.
Shenandoah Secure and Staff Secure	The facility will sometimes shift beds from secure to staff-secure and vice-versa to accommodate the needs of ORR. As a result their numbers at the individual programs may
Chicken Pox	If an entire facility is under quarantine due to chicken pox, their open beds should be zeroed out.
BCFS San Antonio TFC	Usually they save beds for transfers from other programs.
IES Foster	For questions regarding capacity, please contact Arminda Morgado Garcia (956) 802-7722. She oversees all of the programs and can answer any questions regarding their capacity.

Program	Program Type	Reason	Beds Unavailable	Project Officer	Inventory Recovery Category	Estimated Date Beds Available Again	Date Updated	PO Update/ Actions Taken
---------	--------------	--------	------------------	-----------------	-----------------------------	-------------------------------------	--------------	--------------------------

INVENTORY RECOVERY CATEGORY	INSTRUCTIONS/NEXT STEPS
A - Isolation/Quarantine - Confirmed Consistent with ORR Policy	Coordinate with program and ORR Health Team to identify estimated date for beds again available. Update regularly, particularly at estimated available date.
B - Isolation/Quarantine -Not Yet Confirmed Consistent with ORR Policy	Confirm whether isolation/quarantine procedures in place specifically conform to ORR Health Team's issued policy on isolation/quarantine/medical clearance. All medical clearance/iso/quarantine entries START as category B, and can be made category A after the PO and Health Team confirm that the current iso/quar status does in fact track with ORR policy.
C - Pregnancy or maternal-child	Coordinate with program to develop estimated date when bed will again be available based on anticipated approximate discharge date for UC.
D - Intakes Hold	Discuss with ORR DCS management to determine estimated date for hold to be lifted.
E - Licensure issue - Non-variance	Consult with program to determine estimated date when licensure issue will be resolved. Follow up at or immediately before estimated date.
F - Licensure issue - Variance	Consult with program to determine estimated date when licensure variance will be received. Follow up at or immediately before estimated date to ensure beds return timely to available status.
G - Repairs/structural	Consult with program to determine timeline for repairs and any potential need for reinspection, to determine estimated date for beds to return to available status.
H - Foster home shortfall	Consult with program to determine whether shortfall in foster parents or foster home is short term (e.g., respite period only, family vacation only) or longer term. For short term, determine estimated date to return to available status. For longer term, determine estimated date only if realistic/known, if not report as "More than 30 days."
I - Other medical or reasonable accommodation	Consult with program to determine estimated date beds will return to available status, based on prediction of discharge date for UC or resolution of medical issue. If warranted, clarify with shelter program and Health Team whether an alternative approach to the medical or disability-related accommodation which preserved additional beds is possible.
J - Transgender UC/gender bed assignment	Consult with program to determine estimated date beds will return to available status, based on prediction of discharge date for UC.
K - Multiple Causes/Needs Clarification	This is used when multiple categories of bed unavailability appear in the description. Separate into separate chart rows for each reason for bed unavailability, with granular number of beds for each, and assign category to each row based on this chart.
L - Unknown/Needs Clarification	This is used when the description does not contain enough information to determine the cause of individual bed unavailability. Contact program as required to develop granular information on causes of bed unavailability and use this chart.

		Unavailable Beds

SWK Conroe	Shelter	No reason provided	5	Tanzeena Shireena	L				TX
SWK Presidente	Shelter	Female beds closed for our pregnant minor's that will be having their babies. Female beds are closed as they are currently being filled by medical cleared Females and we cannot house non medically cleared females with them. Female beds are closed due to having two male minor's in the same hall, ORR had initially requested to have a higher number of male beds then we were asked to convert them back to female beds, because of this sudden move we do not have other male beds open within the shelter to where I can place them. Due to our layout if we were to open those beds I would have a male and female bedroom adjacent to each other which is not best practice. 4 male beds closed due to a leak that is currently being worked on.	31	April Young	L				TX
SWK Mesa SS	Staff Secure	Program closing- stop placement	7	Tanzeena Shireena	D				TX

SWK Conroe	Shelter	No reason provided	6	Tanzeena Shireena	L				TX
SWK Nueva Esperanza	Shelter	2 males/ 3 females Due Isolation (exposed to chicken pox, TB-long term)	19	Tanzeena Shireena	B				TX
SWK Presidente	Shelter	Female beds closed for our pregnant minor's that will be having their babies. Female beds are closed as they are currently being filled by medical cleared Females and we cannot house non medically cleared females with them. Female beds are closed due to having two male minor's in the same hall, ORR had initially requested to have a higher number of male beds then we were asked to convert them back to female beds, because of this sudden move we do not have other male beds open within the shelter to where I can place them. Due to our layout if we were to open those beds I would have a male and female bedroom adjacent to each other which is not best practice. 4 male beds closed due to a leak that is currently being worked on.	31	April Young	L				TX

Facility	Discrepancy
CC - Houston	When a baby is in care, he/she takes up two beds, so for each baby in care, the facility will be under their funded capacity by one bed.
Shenandoah Secure and Staff Secure	The facility will sometimes shift beds from secure to staff-secure and vice-versa to accommodate the needs of ORR. As a result their numbers at the individual programs may
Chicken Pox	If an entire facility is under quarantine due to chicken pox, their open beds should be zeroed out.
BCFS San Antonio TFC	Usually they save beds for transfers from other programs.
IES Foster	For questions regarding capacity, please contact Arminda Morgado Garcia (956) 802-7722. She oversees all of the programs and can answer any questions regarding their capacity.

Program	Program Type	Reason	Beds Unavailable	Project Officer	Inventory Recovery Category	Estimated Date Beds Available Again	Date Updated	PO Update/ Actions Taken
---------	--------------	--------	------------------	-----------------	-----------------------------	-------------------------------------	--------------	--------------------------

INVENTORY RECOVERY CATEGORY	INSTRUCTIONS/NEXT STEPS
A - Isolation/Quarantine - Confirmed Consistent with ORR Policy	Coordinate with program and ORR Health Team to identify estimated date for beds again available. Update regularly, particularly at estimated available date.
B - Isolation/Quarantine -Not Yet Confirmed Consistent with ORR Policy	Confirm whether isolation/quarantine procedures in place specifically conform to ORR Health Team's issued policy on isolation/quarantine/medical clearance. All medical clearance/iso/quarantine entries START as category B, and can be made category A after the PO and Health Team confirm that the current iso/quar status does in fact track with ORR policy.
C - Pregnancy or maternal-child	Coordinate with program to develop estimated date when bed will again be available based on anticipated approximate discharge date for UC.
D - Intakes Hold	Discuss with ORR DCS management to determine estimated date for hold to be lifted.
E - Licensure issue - Non-variance	Consult with program to determine estimated date when licensure issue will be resolved. Follow up at or immediately before estimated date.
F - Licensure issue - Variance	Consult with program to determine estimated date when licensure variance will be received. Follow up at or immediately before estimated date to ensure beds return timely to available status.
G - Repairs/structural	Consult with program to determine timeline for repairs and any potential need for reinspection, to determine estimated date for beds to return to available status.
H - Foster home shortfall	Consult with program to determine whether shortfall in foster parents or foster home is short term (e.g., respite period only, family vacation only) or longer term. For short term, determine estimated date to return to available status. For longer term, determine estimated date only if realistic/known, if not report as "More than 30 days."
I - Other medical or reasonable accommodation	Consult with program to determine estimated date beds will return to available status, based on prediction of discharge date for UC or resolution of medical issue. If warranted, clarify with shelter program and Health Team whether an alternative approach to the medical or disability-related accommodation which preserved additional beds is possible.
J - Transgender UC/gender bed assignment	Consult with program to determine estimated date beds will return to available status, based on prediction of discharge date for UC.
K - Multiple Causes/Needs Clarification	This is used when multiple categories of bed unavailability appear in the description. Separate into separate chart rows for each reason for bed unavailability, with granular number of beds for each, and assign category to each row based on this chart.
L - Unknown/Needs Clarification	This is used when the description does not contain enough information to determine the cause of individual bed unavailability. Contact program as required to develop granular information on causes of bed unavailability and use this chart.

		Unavailable Beds

Facility	Discrepancy
CC - Houston	When a baby is in care, he/she takes up two beds, so for each baby in care, the facility will be under their funded capacity by one bed.
Shenandoah Secure and Staff Secure	The facility will sometimes shift beds from secure to staff-secure and vice-versa to accommodate the needs of ORR. As a result their numbers at the individual programs may
Chicken Pox	If an entire facility is under quarantine due to chicken pox, their open beds should be zeroed out.
BCFS San Antonio TFC	Usually they save beds for transfers from other programs.
IES Foster	For questions regarding capacity, please contact Arminda Morgado Garcia (956) 802-7722. She oversees all of the programs and can answer any questions regarding their capacity.
